

Technical requirements corde lisse (aerial acrobatics)

- Single (1) rigging point, minimum load of 200 kg, at a height of 5-9 metres. Optimal height is 7 metres.
- A free playing area in the air, and on the floor, of at least 2 metre radius.
- Music and amplification system, CD or MP3.
- Lighting as discussed.
- Ladder or climbing system for rigging (only for rigging and derigging use, not required during the show).
